PROJECT EXPERIENCE

Independent Projects   **Petaling Jaya, Selangor**
UniNow   **Jan 2022 - Feb 2023**

• Implemented a responsive and user-friendly interface, optimizing the portal for various mobile devices and browsers, enhancing user experience.

• Designed and developed a robust mobile student portal from the ground up, ensuring seamless access to essential academic information, including class schedules, grades, and campus announcements.

• Conducted user testing and feedback sessions to make iterative improvements based on user preferences and needs.

Independent Projects   **Sharjah, United Arab Emriates**
SouqArtisan   **Jul 2023 - Aug 2023**

• Developed the Souq Artisan mobile application, an e-commerce platform designed to support local artisans by providing them with a space to sell their handcrafted products, demonstrating proficiency in mobile app development.

• Designed a user-friendly interface that allows local artisans to showcase their unique creations and prepared the app for potential launch.

• Illustrated coding expertise and a dedication to producing high-quality applications, emphasizing the ability to bring unique concepts to life through mobile app development.

Independent Projects   **Sharjah, United Arab Emirates**
PropertyPulse   **Sep 2023 - Nov 2023**

• Propertypulse, a comprehensive real estate application designed to provide users with a user-friendly platform for browsing properties, checking prices, and contacting agents.

• Developing a visually appealing and intuitive user interface that enables users to effortlessly navigate property listings and access relevant information.

• Demonstrating proficiency in mobile app development, with a focus on creating a practical solution for individuals interested in the real estate market.
